EDUCATION

Ghulam Ishaq Khan Institute of Engineering Sciences and Technology

Sep 2024 - May 2028

Bachelor of Computer Engineering

CGPA: 3.48 / 4.00

- **Honors** | Dean's Honor List

TECHNICAL PROJECTS

LogiTrack PK | [GitHub](#) | [Demo Video](#) | [Live URL](#)

Jun 2026

- Architected a Zero Trust supply chain platform using Streamlit, Python, and PostgreSQL.
- Deployed via Docker on AWS EC2, featuring 4-tier RBAC to secure 100% of ACID transactions.
- Integrated AG Grid and Plotly analytics to process 10,000+ logistics records with sub-second latency.

CareSync Hub | [GitHub](#)

Dec 2025

- Engineered a Raylib-based management system backed by SQLite3, improving startup times by 10%.
- Built a Binary Search Tree for $O(\log n)$ doctor lookups and a 1000-bucket Hash Table for $O(1)$ patient access.
- Developed an overlap-detection scheduling algorithm to prevent 100% of double booking conflicts.

EduMate Study Platform

Feb 2025

- Developed a responsive full stack React and Flask application using Tailwind CSS for cross-device compatibility.
- Integrated the Google Search API to autonomously extract educational content for student resource management.
- Automated flashcard creation from fetched content, generating 200+ card sets and saving users an estimated 70% of prep time.

Pakistan Real Estate Market Analysis | [GitHub](#)

Dec 2024

- Processed 53,000+ property records using Pandas and NumPy for data cleaning and standardization.
- Applied quantile-based statistical filtering to remove the top 1% of pricing outliers and enhance accuracy.
- Mapped pricing trends across 9 major cities using Matplotlib and Seaborn to deliver actionable market insights.

EXPERIENCE & LEADERSHIP

Team Swift

Oct 2025 - Present

Head of Research and Development

- Co-developed an autonomous fixed-wing aircraft for the Pakistan UAS Competition 2025, architecting the primary navigation and mission control systems for the Preliminary Design Report.
- Designed and documented the Proportional-Integral-Derivative (PID) control algorithm schematics and authored the comprehensive Qualification Test Plan for the Critical Design Review.

Association of Computing Machinery (ACM)

Oct 2024 - Present

Tech and Coverage Team Member

- Designed data-driven promotional materials for Softcom 2025 using Adobe Photoshop, Figma, and Canva, driving a 35% increase in event registrations and expanding digital reach to 10,000+ targeted students.

GIKI Debate Team

Oct 2024 - Present

Head of Marketing and Debater

- Competed in Columbia IV 2025 debate tournament against teams from Stanford University, Yale University, and Duke University.
- Created marketing materials that drove 51,000+ post views and grew team social media presence by 12% in one month.

TECHNICAL SKILLS

Languages | C++, Python, JavaScript, SQL (PostgreSQL, SQLite), Verilog, HTML, CSS

Frameworks and Libraries | Streamlit, React.js, Flask, Tailwind CSS, Pandas, Plotly, NumPy, AG Grid, Raylib

Hardware and Tools | FPGA, Xilinx Artix-7, Vivado, Multisim, SolidWorks, AutoCAD

Developer Tools | Docker, AWS (EC2), Git, Linux, Figma, Adobe Photoshop, Canva

Certifications | Database Design and SQL in PostgreSQL

Spoken Languages | English (Fluent), Urdu (Fluent)
